

Student Expectations

ASTR 1010 and ASTR 1020 are part of GSU's core area D lab science sequence requirements. To receive credits for completing a lab science sequence you are expected to complete a two semester lab science within a single discipline, such as astronomy, biology, etc. Therefore, you must regularly attend astronomy lab once a week and pass the lab portion of the course to meet the lab science requirements. You cannot pass ASTR 1010/1020 without passing the lab portion of the courses.

Students are expected to;

- Attend to lab section in which they are enrolled every week (check your CRN to determine when your lab section meets each week.)
- Arrive on time for lab each week.
- Print out a copy of the lab before coming to lab class (pdf file provided.)
- Complete the lab activity by the due date and time. Late labs will not be accepted.
- Clean the lab space they used before leaving the lab room.
- No food or drink is allowed in the lab room.
