

## Review Game

### The Procedure

- You pick up a stack of questions at the front desk
- You write your name in the “Name” space for all of them
- You answer all of the question (you can get help if you need it!)
- If you got help from another person, write down that person's name in the “Helper” space
- Turn in your questions and pick up a new stack
- Repeat the process until there are no more questions left

If you get a question you've seen before (during the game), ask for a new one. You won't get any points for answering the same question multiple times.

### Anatomy of a Question

Name: Your name

Helper: The name of the person who helped you

Question Type: What kind of question it is (Multiple Choice, Short Answer, Math)

Question Rating (QR): How much you have to gain by getting the question correct

Possible Cost (PC): How much you have to lose by getting the question wrong

### Scoring

- If you answer a question alone and get it correct, you get the listed Question Rating (QR).
- If you answer a question alone and get it wrong, you lose the listed Possible Cost (PC).
- If you have help, and you answer a question correctly, both you and the person who helped you get the listed QR
- If you have help, and you answer a question **incorrectly**, you lose the listed PC, but the person who helped you loses nothing.

	Right	Wrong
Alone	You get the QR	You lose the PC
with Help	You get the QR	You lose the PC
	The Helper gets the QR	The Helper loses no points
