ROGER F. GRIFFIN (1935 - 2021)

A complete Obituary was published by Elizabeth Griffin in *The Observatory* (2021, vol. 141, No. 1285, 322-332).

The present text is presented for publication in the IAUDS Circular in order to recognize the death of a colleague who was a reference in Spectroscopic Binary research, above all. In addition, from our personal perspective, we want to acknowledge Roger for his important collaboration with our group. He received our Doctoral students with great hospitality at Cambridge and he coauthored publications with us, combining his Spectroscopic solutions with our visual orbits. Above all, we remember Roger for his friendship and for being a good man.

Now, every time that we receive a new issue of *The Observatory*, we miss Roger's ample and rigorous articles concerning observations and orbits. We completely agree with Elizabeth in that "we have lost an astute observer, a gifted instrument user and adjuster, a deep intelligence of things astrophysical, an encyclopedic knowledge of bright stars, and a compulsive proof-reader."

May he rest in peace.

José Ángel Docobo

DIMITRI POURBAIX (1969 - 2021)

Dimitri Pourbaix, the newly elected Vice-President of IAU Commission G1 on Binary Stars, passed away on 14 November 2021 after complications from cardiac surgery last April.

He was born in Charleroi, Belgium on 22 May 1969 and was working as Senior Research Associate of the National Fund for Scientific Research (FNRS) at the Université Libre de Bruxelles (Belgium).

Since obtaining his Ph.D. in Astronomy from the Université de Liège in 1998, he was a specialist in the determination of the orbital parameters of binaries. He was the Manager of the 9th Catalog of Orbits of Spectroscopic Binaries for the former IAU Commission 26. With the advent of the Hipparcos Catalog, he also made a speciality of reprocessing the data to improve the information for some specific types of stars (Binaries, C stars, Oxygen-rich Mira Variables, substellar companions, ...). All these works were the subject of the aggregation thesis he defended in 2007. In addition, he was fond of scientific computing and optimization problems.

Since 2006, he led the Belgian participation in the GAIA data processing consortium and was principally dedicated to the management of the Coordination Unit devoted to object processing. Sadly, he will never see the publication of the long-awaited Catalog of Binary Stars due for GAIA DR3 next year to which he contributed significant effort.

In addition to his scientific activities, he also enjoyed public outreach, sharing his passion with lectures (“Cours Public d’Astronomie”) and observing nights.

Dimitri had a rich personality and was a connoisseur of the good things in life. His colleagues remember that the conversations with him could be energetic and tough while he personally was generous, benevolent, and kind. He was a dedicated husband and the father of a young son.

Past affiliations within the IAU:

- Vice-President of IAU Commission G1 on Binary Stars (2021)
- Past Steering Committee Member of Division A, Fundamental Astronomy (2012-2015)
- Past President of the former IAU Commission 30 (Radial Velocities) (2012-2015).
- Past Chair of Commission 26 WG Catalog of Orbital Elements of Spectroscopic Binary Systems (until 2015)
- Past Organizing Committee Member of Commission 26 Double & Multiple Stars (2006-2012)

Frédéric Arenou

The deadline for contributions to Information Circular No. 207 is:
