SFP INVESTIGATION PLOTS FOR INDIVIDUAL SYSTEMS

This appendix includes the plots used to inspect individual observations for separated fringe packets as described in §3.1.1. The figures are listed in order of HD number, baseline, UT observing date, and sequence number. The sequence number identifies multiple observations for the same star on a given night. The captions of the figures specify the above parameters, and their format of is the same as that of Figures 3.5 and 3.6.

FIGURE B.1: SFP inspection for HD 000166 with S1-E1 on UT 2007/07/29, seq 001

FIGURE B.2: SFP inspection for HD 000166 with S1-E1 on UT 2007/08/14, seq 001
